Team,

Shapefiles have been uploaded and configured. Thanks for sending those.

- Address Points
- Parcels
- Municipal Boundary
- Schools

I can modify the viewing of any of those (colors, transparency, viewing height, labels, etc.) but not the actual content.

Let me know what you think.

Thanks,

Alex Menke

Hi Ryan,

What's your availability this week to sync over this and get the shapefiles?

Thanks,

Alex Menke

Please let me know if that works or if you need anything else

Thanks

Ryan

Subject: RE: Bluffton PD / FlockOS - ESRI Layers

Ryan I would like to see a couple things with this:

1. See if we can add a layer of the current district zone assignments that we have
2. Due to the pocket holes perhaps another layer of what is within our jurisdiction and what is not
3. Blueprints of the schools like we did with the GIS Map.

Thank you

Chief Joe Babkiewicz

Good morning, Ryan,

I'm working with Bluffton PD to get ESRI layers added to their Flock Safety map. We typically upload beats, city limits, and parcel layers for addresses, though we can upload more (ex: hunting zones, school districts, etc). Two ways we can load the ESRI layers: you can send us a link to a publicly hosted ESRI feature server, or you can send zipped shape files that we can host for you.

Please send the layers at your earliest convenience.

Thanks!

Kelly Baeza
Technical Project Manager
