Sensitivity: Normal

Alex, I will see if we have a list currently with the lat/long- They are all on our GIS maps and I'm not sure how he records them. May be a quick dump, or not!

Regards,

Bob

Hi Team,

I've successfully added 98 cameras from the list Bob provided. There is a new network only available to admins currently. While most cameras are loading correctly, a few are not working as expected. Some of these were noted on Bob's list as potentially non-functional, and I've already followed up with Bob regarding the other cameras that are not connecting. I'll continue to collaborate with him to resolve these issues.

For now, I've placed all camera locations at the police department. I'll do my best to update these locations based on the camera names. If you have a list of camera names with their corresponding latitude and longitude, please send it my way, and I can update the locations in bulk.

Thanks to Bob and Clay for all their assistance with this!

Have a great weekend.

Best,

Alex Menke

> >
> > Check the following:

1. “User assignment required?” = No

If **enabled**, only users explicitly assigned can access the app — which blocks JIT provisioning for unassigned users.

To check:

- Azure AD → **Enterprise Applications** → [Flock App] → **Properties**
- Set **User assignment required?** to **No**

2. SAML Attributes Must Include Email

Flock needs to **match or create** users using a unique identifier — usually the **email address** in the SAML assertion.

Ensure Azure is sending:

- `NameID` = user email (or user principal name, if that’s how Flock matches accounts)
- OR a custom claim like `email` = user.email

To verify:

- Azure AD → **Enterprise Applications** → [Flock App] → **Single sign-on** → **Attributes & Claims**
- Ensure at least one claim contains a valid email address for the user

3. Claims Are Sent Even for New Users

Sometimes, custom claims are scoped only to assigned users or groups. Ensure that your claims (especially the email) aren’t conditional on group membership or a dynamic rule.

4. The User’s Azure AD Profile Is Properly Populated

If `user.mail` is blank (which can happen with service accounts or synced accounts from on-prem AD), the email claim may not be populated, and Flock won’t create the user.

To check: Go to Azure AD → **Users** → [select user] → Ensure `Email` or `UserPrincipalName` is correctly filled out

Test with a brand-new AD user

If you have a test user who is not assigned to the app but exists in AD and has the correct email fields, try signing in via the SSO login URL. If they’re blocked, the sign-in logs should tell you exactly why.

Let me know if you have any questions or concerns.

Thanks,

Alex Menke

>
> Try this: Azure AD only allows access to users that have been explicitly assigned to the SAML application, **unless** the setting “User assignment required?” is set to **No**.

What to check:

- In Azure AD → **Enterprise Applications** → Flock App → **Users and groups**
  Make sure the affected user is listed here.
- If not, either:
  - Add the user, or
  - Go to **Properties** and change **User assignment required?** to **No** (if appropriate for the org's security posture).

Let me know if that works.

Bob,

Can you check the Active Directory permissions for Chief? If it worked for you then I would assume he doesn't have access via AD.

Thanks,

Alex

Good afternoon,

I just went to sign into Flock and it is now giving me an error. It has been doing it all day. I am trying to input information into a case from last night. The message I received is that I need permission from administration to go into Flock. Can someone tell me what is going on and how do we fix this????

Chief Joe Babkiewicz

Thanks, Bob!

Are folks logging in to Flock via SSO? If so, I'll go ahead and mark this integration complete. Please send the list of cameras at your earliest convenience today.

Thanks,

Excellent, thank you for sending the rails.

I spent the afternoon working on the camera sites that were down when you were here and have most of them running again. Need a little tree trimming next week to get the remaining three back up. That said, I will be able to configure those cameras now for Flock. List will be as complete as possible and to you by Monday.

Again, the SSO tested out so another win!

I'll be in touch, hope you have a good weekend.

Bob,

Please keep me posted on the camera list and user/pass, once that is to me I can then configure the streams.

I mailed you rails for the NVR to go into the server rack.

SSO is ready to test.

Thanks for all the help so far.

Enjoy your weekend.

Thanks,

Alex Menke

Bob,

Please follow up with the remaining camera list when you can.

Thank you very much for getting the hard parts completed with me yesterday, should be downhill from here with adding the remaining cameras.

Thanks,

Alex
