Flock Safety

Chief Babkiewicz,

We are writing to inform you of an issue that affected **NCIC list alerts** on **April 3, 2026**.

Between **11:00 AM EDT and 12:09 PM EDT**, a configuration error in our plate parsing system impacted how NCIC list matches were processed. As a result:

- Some alerts were generated for plates that were **not actually on the NCIC list**.
- During the same period, some valid NCIC hot plate alerts **were not sent as expected**.

At **12:09 PM EDT**, we **temporarily disabled NCIC list alerts** while we investigated. At **1:12 PM EDT**, we **corrected the configuration issue and re□enabled the NCIC source** for all eligible users. We have also **removed invalid matches from alert history** so they no longer appear as active NCIC hits in the Flock system.

Please note: **email and SMS notifications that were sent before the issue was resolved cannot be rescinded**. If your agency took action based on NCIC alerts during this window, we recommend reviewing those incidents in line with your internal procedures and confirming status directly in NCIC where appropriate.

This issue is fully resolved, and NCIC list alerts are now functioning as expected. We are reviewing our validation and monitoring processes to eliminate the risk of similar issues in the future.

If you have questions about specific alerts or need assistance reviewing activity from this timeframe, please contact support@flocksafety.com.

Thank you for your partnership and for all you do to keep your communities safe.

Sincerely,
Chris Colwell
SVP, Customer Experience
