EDITOR'S NOTE | FEBRUARY 2026

You're reading the very first edition of our monthly Flock Safety newsletter — a brand new resource created to empower you and your community. We're launching this newsletter with a **clear purpose: to put the latest solved stories, breakthrough product updates, and actionable insights right at your fingertips**, so you can lead with confidence and make a real impact on public safety.

But don't let these updates stop with you! The more we spread these stories and tools, the greater our collective impact.

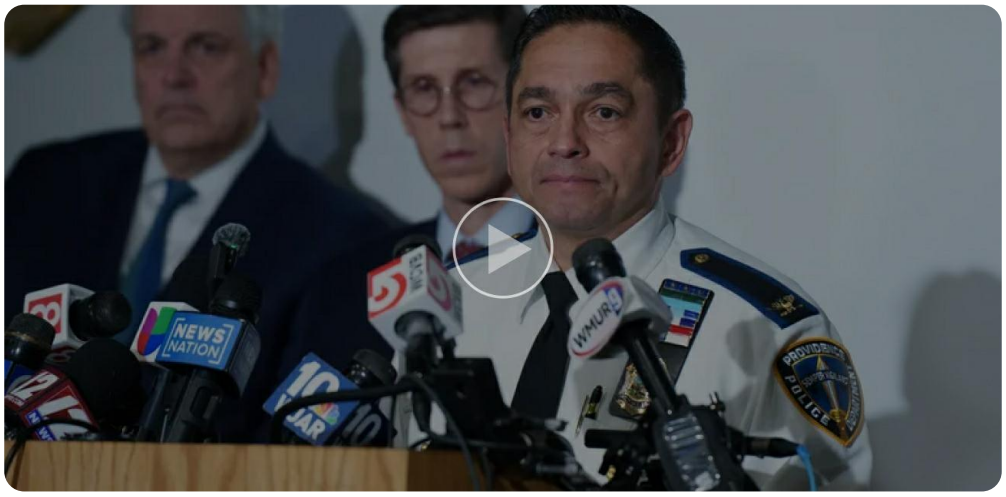

Forward this email to your city council, include highlights in your community newsletters, and share it with anyone who cares about building safer, stronger neighborhoods.

Let's set the standard for transparency, action, and community partnership — together.

— Chris Colwell, SVP, Customer Experience

SOLVED STORIES

Finding the Brown University Shooter

In a high-profile case connected to Brown University and MIT, investigators used Flock LPR and Freeform (an AI-powered feature that lets you search across LPR images and integrated video using plain language) to rapidly identify a suspect vehicle, trace it to a rental agency, and confirm the individual's identity.

WATCH THE PRESS CONFERENCE

RELATED: Cambridge cut ties with Flock Safety. Days later, an MIT

professor was killed — and the suspect was found using Flock's tech.

> **Flock, and the LPR was able to provide us with this description of this vehicle. Through that, the agents and their work were able to get us footage of this individual as well as a copy of the agreement, which provided his real name."**

Oscar Perez, Police Chief, Providence PD

SOLVED STORIES

Reducing Response Times to Gun Violence

Our gunshot detection technology can be used to reduce response times to calls of gun violence. Read more here how Greenville, Mississippi, our first Safe City in Mississippi, used it to apprehend their suspect.

For more information on how gunshot detection technology can be used in your community, reach out to us here.

Solving a Double Homicide in Michigan

Shelby Township Police Department used automated license plate recognition to help solve a double homicide at a local car dealership. The outcome reinforced how timely, objective data supports accountability and confidence in investigative decisions.

Read more here about how our ALPR cameras played a pivotal role in solving a double homicide at a car dealership in Shelby Township, Michigan.

MAKING A DIFFERENCE

With Flock Safety technology, San Diego police recovered over **$3 million in stolen property and over 250 suspects in custody.**

Since inception, Lexington (KY) police has located **31 missing persons, recovered 356 stolen vehicles, and recovered over $5.3 million** in stolen vehicles.

LEADERSHIP & COMMUNITY MOMENTS

Garrett's Direct Conversations with Chiefs

Garrett hosts office hours with Chiefs to hear what's working and where agencies want to go next, keeping leadership voices central to how we support agencies. Register for his Q&A sessions by clicking here. New times will be added as they become available.

REGISTER FOR OFFICE HOURS

External Affairs Support and Direct Access

Our External Affairs team partners with agencies on public records, legislation, and community concerns. Chiefs and command staff can email community@flocksafety.com for support on upcoming votes, media, and

transparency planning.

PRODUCT UPDATES

Offense Type Selection for Searches

We now require an Offense Type from a prefilled dropdown for every search. Before running a search, users are required to select an offense type from a NIBRS-based list. For more information on this change, please visit our blog post here.

Clearer Explanations for Audit Records

We've added clear disclaimer text to explain what information means when customers or the public see records with ***. This message clarifies that the information does exist, but is intentionally only visible to the searching agency.

Self-Serve MFA Reset for Administrators

Agency administrators can now reset multi-factor authentication for users without contacting support. Click here to learn more about how you can do this.

Agency-Level Control for Federal Data Sharing

Agencies can now decide, at the agency level, whether they receive data-sharing requests from federal partners. To see how, watch a quick video here.

NEWS & EVENTS

Washington State Update

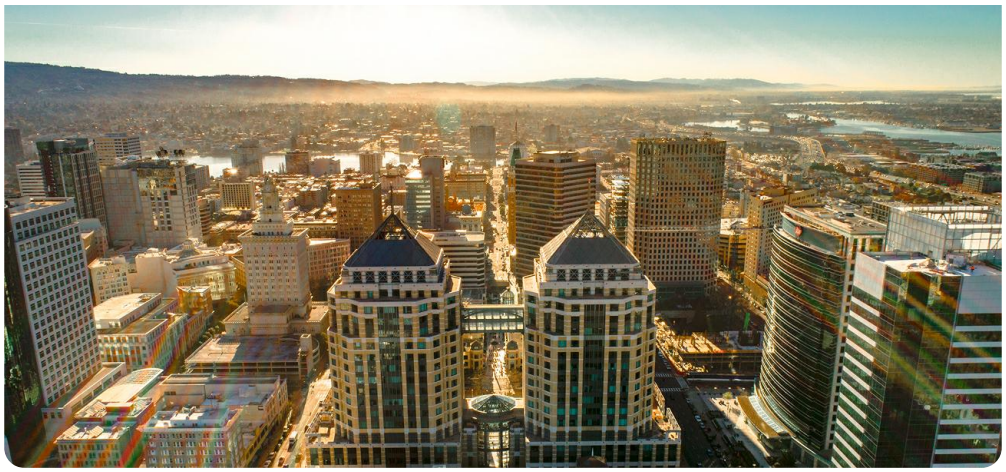

A win for agencies using Flock everywhere.

A recent decision from the Pierce County Superior Court (Rodriguez v. City of Lakewood) brings welcome clarity for agencies using license plate recognition (LPR) technology.

In its ruling, the court found that LPR data stored in the cloud is not subject to disclosure under Washington's Public Records Act (PRA). This represents an important and positive step forward for agencies relying on LPR to support public safety.

Oakland & San Diego City Council Support

Oakland and San Diego City Councils overwhelmingly renew Flock contracts with a 6-3 vote in San Diego and a 7-1 vote in Oakland. If you would like a Flock representative to engage with your elected leaders ahead of a vote, reach out here.
