Good Afternoon,

In coordination with The Home Depot (THD), we are working to provide agencies with state access to THD cameras for both search and hotlist capabilities as a part of their rollout.

The only requirement is for the below template to be **sent to the head of the agency**. No further action is required from you. You should expect to receive access to The Home Depot's statewide cameras within 1-2 weeks.

—

The Home Depot would like to provide your agency with state-wide access to The Home Depot owned Flock safety systems. This technology will assist in preventing or investigating criminal activity in the local community we both serve. The Home Depot technology and your department's access to such should only be used for bona fide investigations, which are documented within your department and via audit trail within the Flock Safety platform. These investigative tools and technology will not be permitted for personal use, for use on unauthorized devices or by unauthorized users within your department. I understand if the technology is not used correctly, The Home Depot reserves the right to terminate the department's access to The Home Depot owned Flock safety systems.

If your agency has any questions or concerns, please let me know.

Thanks,
Georgia
