Hi there,

I'm excited to reach out about a Flock feature we're rolling out to your organization: Audit Assistance.

We built this because we know how manual and time-consuming audit reviews can be today. With large volumes of data to sift through, it's easy for important details to get lost. Audit Assistance is an analytics tool that aggregates data already captured in your Organization Audit, surfacing it in a more actionable, streamlined view - making compliance reviews faster and easier for your team. No new data is collected; it is a new interface for seeing the same data already logged in your Organization Audit. For a description of what insights are available through Audit Assistance, our Auditing Best Practice Guide has additional information.

If your agency is in a state with broad public records laws, we'd recommend evaluating how a data-aggregation view like Audit Assistance is treated under those laws.
The tool is designed to help administrators understand organizational activity without being accusatory – think of it as an intelligent assistant that helps you stay on top of your oversight duties. To activate this new feature, those with admin privileges can navigate to your organization settings in Flock and enable Audit Assistance, or reply to this email for assistance.

Here are some resources to help you get started;

- Audit Assistance Help Article
- [Video] How Audit Assistance is helping improve transparency and accountability

As always, please feel free to reach out with any questions or concerns.

Best regards,

Heather Ouellette
