Hello Chief Babkiewicz,

Hope you're doing great!

We just announced some updates on Friday that I was hoping to get your feedback.

Here's the short version: We've been adding live video to existing LPRs as part of a bundled solution and are seeing strong results.

A few key benefits:

- **See more context** around every LPR read. Get a better visual of what's happening from a different angle—useful in parking lots, intersections, or high-traffic areas.
- **Speed up investigations** by seeing what happened before and after a vehicle passes through the LPR field of view.
- **Improve situational awareness** in places where foot and vehicle traffic overlap or visibility is limited.

You might be thinking, "Isn't that already possible?" It is, but what's new is the pricing. You can now upgrade your existing LPRs for just **$500 a year** and a **one-time $150 install fee**. We can also do this on all new LPR cameras moving forward.

It's an easy, low-cost way to increase the value and coverage of your current camera network.

I'd love to set up a quick meeting to get your feedback on how your team would use this. Plus, if it makes sense, review your locations and identify where we can bring the most value right away.

Would early next week work for a 20-minute call?

Taylor
